Subject: RSS-102 SPR-APD, Issue 1 – *Supplementary Procedure for Assessing Specific Absorption Rate (SAR) and Absorbed Power Density (APD) Compliance of Portable Devices in the 6 GHz Band (5925-7125 MHz)*

Dear Ms. Gallant,

In November 2021, the Department requested the RABC review the draft issue 1 of RSS-102 SPR-APD, – *Supplementary Procedure for Assessing Specific Absorption Rate (SAR) and Absorbed Power Density (APD) Compliance of Portable Devices in the 6 GHz Band (5925-7125 MHz)*. The Board assigned the review of the Supplementary Procedure to its Electromagnetic Compatibility (EMC) Committee. At the request of the Department, RABC also posted the consultation on its website to facilitate comments from Canada’s World Trade Organization (WTO) partners.

The EMC Committee held one call to review the Supplementary Procedure. RABC members have not identified any concerns with the proposed Supplementary Procedure. Accordingly, the Board recommends the Department publish the document.

In addition, RABC received comments from 5 stakeholders via the WTO portal on its website. These have been forwarded to the Department for consideration.

The Board has now completed its review. We appreciate having had the opportunity to review the updated standard.

Sincerely,

J. David Farnes
General Manager
