**Subject: Guidelines for the Preparation of Radio Frequency (RF) Exposure Compliance Reports for Radiocommunication and Broadcasting Antenna Systems (GL-08)**

Dear Josette Gallant,

In August 2022, the Department requested the RABC review draft Issue 3 of *Guidelines for the Preparation of Radio Frequency (RF) Exposure Compliance Reports for Radiocommunication and Broadcasting Antenna Systems (GL-08)*. This document provides guidelines and establishes minimum parameters required to be included in radio frequency (RF) exposure compliance reports prepared by proponents and operators of all radiocommunication and broadcasting antenna installations.

The Board assigned the review of the standard to its Safety Code 6 Subcommittee.

The Safety Code 6 Subcommittee held one call to review the proposed changes. Approximately 15 members participated and provided feedback to the Department. The comments from the Subcommittee have been captured in the attached draft of GL-08.

The Board has now completed its review. We appreciate having had the opportunity to review the updated standard.

Sincerely,

J. David Farnes  
General Manager
