Subject: RSS-102, Draft Issue 6

Dear Josette Gallant,

In June 2023, the Department requested that RABC review the draft sixth issue of Radio Standards Specifications (RSS) - 102 – *Radio Frequency (RF) Exposure Compliance of Radiocommunication Apparatus (All Frequency Bands)*, together with a series of companion documents. The Board assigned the review of the standard to the Electromagnetic Compatibility (EMC) Committee. At the request of the Department, RABC also posted the draft of RSS-102, Issue 6, on its website to facilitate comments from Canada’s World Trade Organization (WTO) partners.

The EMC committee held one meeting to review the revised standard during which the Department provided an overview and presented the new architecture for the standard. Members of the EMC committee have not raised any concerns with the proposed update to the standard.

RABC received ten sets of comments via the WTO portal on the Board’s website. The comments were forwarded to the Department for consideration.

The Board has now completed its review. We appreciate having had the opportunity to review the updated standard.

Sincerely,

J. David Farnes
General Manager
