**Subject: RSS-295, Draft Issue 1**

Dear Josette Gallant,

In January 2024, the Department requested that RABC review the first draft issue of Radio Standards Specification, RSS-95 – *Licence-Exempt Radio Apparatus Operating in the Frequency Bands 116-123 GHz, 174.8-182 GHz, 185-190 GHz and 244-246 GHz*. The Board assigned the review of the standard to the Fixed Wireless Communications Committee (FWCC). At the request of the Department, RABC also posted the draft standard on its website to facilitate comments from Canada’s World Trade Organization (WTO) partners.

The FWCC held one meeting to review the new standard, during which feedback was provided to the Department. Members of the Committee have not raised any concerns with the proposed standard.

In addition, RABC received two sets of comments via the WTO portal on the Board’s website. The comments were forwarded to the Department for consideration.

The Board has now completed its review. We appreciate having had the opportunity to review the updated standard.

Sincerely,

J. David Farnes  
General Manager
