Re: RSS-222, Draft Issue 4; DBS-01, Draft Issue 4; and CPC-4-1-01, Draft Issue 2

Dear Josette Gallant,

In May 2024, the Department requested the RABC review proposed updates to Radio Standard Specifications, RSS-222, draft Issue 4 – *White Space Devices (WSDs)*; and White Space Database Specification, DBS-01, draft Issue 4, – *White Space Database Specifications*; and CPC-4-1-01, draft Issue 2, *Application Procedures for White Space Database Administrators (WSDBAs)*. The Department also requested the consultation for RSS-222 be posted to the RABC website in order to facilitate the receipt of comments from WTO members.

The Board created a special working group to undertake the review of the standards. The working group held one call to review the initial draft of the procedure document. During the call, RABC members and invited guests provided feedback to the Department.

The Board also received two comments via the WTO Portal on its website. These comments were forwarded to the Department for consideration.

The Board has now completed its review. We appreciate having had the opportunity to review the updated standards.

Sincerely,

J. David Farnes
General Manager
