**Subject: RSS-Gen, draft issue 6, *General requirements for compliance of radio apparatus*; and
RSS-310, draft issue 6, *Licence-exempt radio apparatus: category II equipment***

Dear Josette Gallant,

In February 2026, the Department requested that RABC review new draft issues of RSS-Gen, *General requirements for compliance of radio apparatus*; and RSS-310, *Licence-exempt radio apparatus: category II equipment*. The Board assigned the review of the standard to the EMC Committee. The Committee held one meeting to review the new standard. During the meeting, member feedback was provided to the Department.

Also, at the request of the Department, RABC posted the draft standard on its website to facilitate comments from Canada's World Trade Organization (WTO) partners. We received comments from eight stakeholders via our WTO portal. These comments were forwarded to the Department for consideration.

The Board has now completed its review. We appreciate having had the opportunity to review the standard.

Sincerely,

J. David Farnes
General Manager
