Subject: SRSP-310.7, Issue 5 (Draft) — *Technical Requirements for Fixed Line of-Sight Radio Systems Operating in the Band 10.7-11.7 GHz*

Dear Josette Gallant,

In June, the Department requested that RABC review new draft issues of SRSP-310.7 — *Technical Requirements for Fixed Line of-Sight Radio Systems Operating in the Band 10.7-11.7 GHz*. The Board assigned the review of the standard to the Fixed Wireless Communications Committee. The Committee held one meeting to review the new standard.

During the meeting, member feedback was provided to the Department. RABC noted that in the associated spreadsheet containing the channel plans, in the Overview tab, the column “Values of N for all subsequent worksheets”, the values should end at 49 rather than 50.

Also, at the request of the Department, RABC posted the draft standard on its website to facilitate comments from Canada’s World Trade Organization (WTO) partners. We received no comments via our WTO portal.

The Board has now completed its review. RABC recommends the standard be published as drafted. We appreciate having had the opportunity to conduct the review.

Sincerely,

J. David Farnes
General Manager
