Dear Ms. Gallant,

Re: RSS-251, Issue 2, CONSULTATION DRAFT, March 2018 – Vehicular Radar and Airport Fixed or Mobile Radar in the 76-81 GHz Frequency Band

In March 2018, the Department requested the RABC to create a working group to review draft versions of RSS-251, Issue 2. Further, the RABC was requested to make the draft standard available on its website and to receive comments as part of the World Trade Organization's (WTO) notification process.

The Board established a working group comprising of approximately thirty participants and held one call to review the draft. A number of guests from the automotive industry also participated. During the review call, feedback was provided on the draft standard. The Department then issued a revised Consultation Draft in June.

Eight submissions were received on the RABC's WTO portal. These submissions were forwarded to the Department for review.

RABC members have not identified any concerns with the proposed standard. This concludes our review. We appreciate the opportunity to provide input.

Sincerely,

J. David Farnes
General Manager
