(Submitted by email)

Dear Ms. Gallant,

Re: RSP-100, Issue 12, Certification of Radio Apparatus and Broadcasting Equipment

In March 2019, the Department requested the RABC review the proposed changes to RSP-100. The Board informed its members of the review asking them to provide their feedback on the changes via email. RABC members have not raised any concerns regarding the proposed changes. The Board also contacted a Canadian manufacturer of broadcast equipment, that is not a member of RABC. The manufacturer expressed no concern with the proposed changes to RSP-100.

Also, at the request of the Department, the consultation was posted to the RABC website in order to facilitate the receipt of comments from WTO members. We received correspondence from six organizations in response to the posting. The correspondence was forwarded to the Department for consideration.

This concludes our review. We appreciate the opportunity to review the proposed standard.

Sincerely,

J. David Farnes
General Manager
