Dear Ms. Gallant,

**Re: RSS-210, Issue 10, Licence-Exempt Radio Apparatus Category I Equipment**

In June 2019, the Department requested the RABC review the proposed changes to RSS-210. The Department also requested RABC post the consultation to the RABC website in order to facilitate the receipt of comments from WTO members.

The Board created a special working group to conduct its review of RSS-210. The Canadian Vehicle Manufacturers' Association and the Global Automakers of Canada were invited to participate in the review. The working group, comprising of approximately 14 participants, held one call to review the proposed changes. RABC members have not identified any major concerns with the proposed changes to the standard.

RABC also received 8 comments via the WTO portal. These comments were forwarded to ISED for response.

The Board has completed its review and is satisfied with the updated draft of RSS-210. We appreciate having had the opportunity to review the proposed changes to the standard.

Sincerely,

J. David Farnes  
General Manager
