(Submitted by email)

Dear Ms. Gallant,

**Re: RSS-222, Issue 2, June 2019 - White Space Devices (WSDs) and
DBS-01, Issue 2, June 2019 - White Space Database Specifications**

In June 2019, the Department requested the RABC review the proposed changes to both RSS-222 and DBS-01. The Department also requested RABC post the consultation to the RABC website in order to facilitate the receipt of comments from WTO members.

The Board created a special working group to conduct its review of the proposed changes to the standards. A representative from 6Harmonics was invited to participate in the review, as a guest. The working group, comprising of approximately 12 participants, held one call to review the proposed changes. RABC members have not identified any major concerns with the proposed changes to either standard.

RABC also received 5 comments via the WTO portal. These comments were forwarded to ISED for response.

The Board has completed its review and is satisfied with the updated drafts of RSS-222 and DBS-01. We appreciate having had the opportunity to review the proposed changes to the standards.

Sincerely,

J. David Farnes
General Manager
