RE: Broadcast Circular-15

Dear Mylène:

The Radio Advisory Board of Canada is pleased to provide its comments to the Department regarding proposed modifications to “On-Air Testing Procedures for Broadcasting Undertakings” (BC-15). The RABC is very appreciative of the additional flexibility provided by the Department in the proposed revision for on-air testing requirements.

A Working Group of the RABC Broadcasting Committee has participated with Department staff to review and update the draft version proposed by the Department. Through collaboration, a number of comments and amendments have been collected by the RABC. These changes are included in the attached document “BC15 Issue 2 RABCcomment_20200423”.

We wish to thank the Department for the opportunity to provide input from the RABC and its members.

Regards,

Kirk Nesbitt
Chair, RABC Broadcasting Committee
