(Submitted by email)

Subject: GL-01, Issue 4, *Guidelines for the Measurement of Radio Frequency Fields at Frequencies From 3 kHz to 300 GHz*

Dear Ms. Gallant,

In June 2021, the Department requested the RABC review proposed updates to GL-01, Issue 4, *Guidelines for the Measurement of Radio Frequency Fields at Frequencies From 3 kHz to 300 GHz*. The Board assigned the review of the guidelines to its Electromagnetic Compatibility (EMC) Committee.

The EMC Committee held one meeting, with approximately 20 participants (including invited guests), to review the document. The Committee is satisfied with the proposed changes to the guidelines and recommends the Department publish the document.

RABC has now completed its review. We appreciate having had the opportunity to review the updated guidelines.

Sincerely,

J. David Farnes
General Manager
