Dear Mr. Daigle,

Re: SRSP-540, Issue 1: Technical Requirements for Public Safety Broadband Systems (PSBS) in the Bands 758-768 MHz and 788-798 MHz

In December 2017, the Department requested the RABC to create a working group to review draft versions of RSS-140, Issue 1. At that time, we were informed that we would also receive a draft SRSP to review. In January 2018, the Board received the first draft of SRSP-540.

The Board established a working group comprising of approximately twenty-five participants and held two calls to review both RSS-140 and SRSP-540. During the review, feedback was provided to the Department.

I am pleased to report that the working group has accepted the draft SRSP-540, Issue 1, as presented by the Department.

We appreciate the opportunity to provide input on the draft SRSP and look forward to its publication.

Sincerely,

J. David Farnes
General Manager
